

# THE SANFORD PROMISE

*Inspiring the Next Generation of Scientists*

## EXHIBITING AT SCIENCE DISCOVERY DAY

Science Discovery Day is designed for high school sophomores and juniors with an interest in the sciences. The program offers the opportunity for 250-275 students to connect with real scientists, employers and representatives from higher education.

We invite you to participate by hosting a hands-on booth that highlights the science and research happening at your school or organization. You are invited to advertise your training programs, degree pathways and participation opportunities to this group of engaged students. If you need assistance with the development of the hands-on aspect, please connect with the PROMISE team for support or materials for your exhibit booth.
